# About

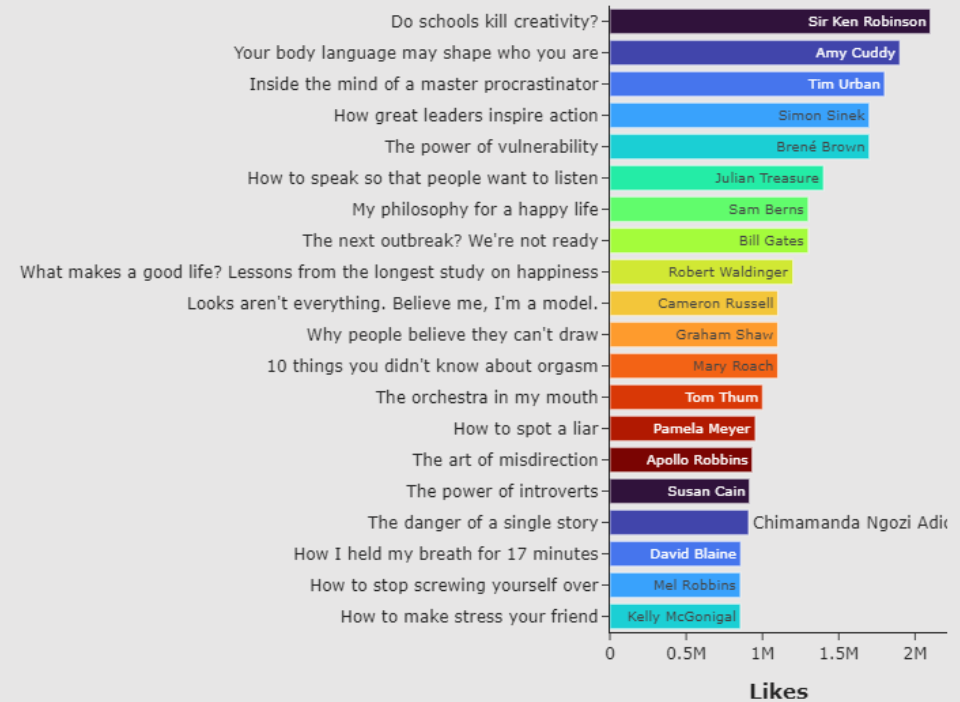

- TED was born in 1984 out of Richard Saul Wurman's observation of a powerful convergence among three fields: technology, entertainment and design.
- The first TED, which he co-founded with Harry Marks, included a demo of the compact disc, the e-book and cutting-edge 3D graphics from Lucasfilm, while mathematician Benoit Mandelbrot demonstrated how to map coastlines using his developing theory of fractal geometry.
- But despite a stellar lineup, the event lost money, and it was six years before Wurman and Marks tried again. This time, in 1990, the world was ready. The TED Conference became an annual event in Monterey, California, attracting a growing and influential audience from many different disciplines united by their curiosity and open-mindedness -- and also by their shared discovery of an exciting secret.
- (Back then, TED was an invitation-only event.)
- The goal of the TED Foundation is to foster the spread of great ideas.
- It aims to provide a platform for thinkers, visionaries and teachers, so that people around the globe can gain a better understanding of the biggest issues faced by the world, and feed a desire to help create a better future.
- Core to this goal is a belief that there is no greater force for changing the world than a powerful idea.
